

## **2009 Course Renovations**

Major Changes have occurred on Sunset & Sunrise during the fall of 2009. The changes, and photos of such changes are found below. Please let the golf course staff know your opinion of the modifications made and what you would like to see occur in the future here at Saugeen by emailing [jeff@saugeengolf.com](mailto:jeff@saugeengolf.com).

### **SUNRISE #1**

In accordance with the Renovation plan, two fairway bunkers have been added to the right side of the fairway. Strategically located at the 125 and 100 yard marker, these bunkers will likely be in play for the majority of the golfers and will help keep balls from scurrying into the hazard. This addition completes the planned changes for this hole.

### **SUNRISE #2**

Three new fairway bunkers have also been added on this hole on the left side of the fairway. Two of which are in sight off the tee with the third, a smaller pot bunker, through the fairway by the 200 yard marker. This addition completes the planned changes for this hole as well.

### **SUNRISE #6**

A new forward tee block has been added in front of the gold tees to align the red tees with the fairway between the ponds. This addition also completes the planned changes for this hole.

### **SUNRISE Items Remaining**

To complete the changes on Sunrise, a new tee is still required on Sunrise #8 and the division of the pond on Sunrise #9 is still yet to be completed.

### **SUNSET #3**

Mounding and a new cart path has been created behind the green on this hole. Major change to the fairway are yet to be completed and will occur in the coming years.

### **SUNSET #7**

The most major changes of the fall occurred on this par 3. A new mound structure has been added down the left side of the fairway which includes a new finger bunker 20 yards from the green. The mounds continue around the back of the green wrapping around to the right side. A new waste area has also been created on the right side between hole 6 and 7. No major modifications were made to this green and the changes completed have finished this hole in accordance to the Cooke Report.

### **SUNSET #8**

A new bunker and mound complex has been added to the right side of the fairway on this par 5. More changes are planned in the coming years for this valuable roadside hole.

### **SUNSET #9**

Major changes to the landing area occurred on this hole this past fall. The landing area to the left side of the fairway has been increased through the moving of trees, while a new bundle of trees has been added to the right side along with a small mound and bunker area around the 100 yard marker. This should direct the flow of balls away from the roadway in the coming years. The back bunker behind the green has also been reconstructed. These changes complete the requirements of the report for now.
